DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a method for protection of germinating seed and a pesticide containing pellet. The special technical feature of this group is that the pesticide is located around the core.

Group II, claim(s) 9 and 11, drawn to a method for preparing a pesticide-containing pellet. The special technical feature of this group is that the pesticide is a thin layer coating on the outside of the pellet.

Group III, claim(s) 10, drawn to a method for preparing a pesticide-containing pellet. The special technical feature of this group is a layer of film on the outside of the killed seed.

The special technical feature of Group I is not found in Groups II and III and the special technical features of Group II is not found in Group III. Thus a lack of unity is held by the examiner.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
